Personal statement

A confident web developer determined to find a great opportunity to put my new skills to use, continuing to learn the necessary tools to excel. Currently a primary school teacher, I am working hard to develop relevant knowledge, focusing primarily on front-end workflow (including HTML, CSS and Javascript). I am developing these skills independently using a range of resources such as freeCodeCamp, where I have recently achieved my Responsive Web Design certificate.

Personal projects

Portfolio site
Responsive site designed to showcase a range of projects and to provide central point of contact.

Snazzy socks
Project completed as part of Free Code Camp's curriculum utilizing CSS flexbox and grid.

100 Days of Code
A social media experiment and a personal commitment to dedicate regular time to developing coding skills, projects and communicating with other developers to seek and give advice.

Javascript algorithms
Learning to solve a range of algorithm problems, the solutions for which I am keeping in a repository on my Github account.

Feel free to explore my expanding range of projects at my **portfolio** or **Github account**.

Other interests

In addition to time spent coding and developing my web developer skills, I am an avid reader and regularly visit the cinema. I maintain my personal fitness through regular exercise and yoga practice and also enjoy hiking and travelling. I have an allotment and love to grow my own vegetables and also enjoy playing esoteric board games.
